Graphic Whizard has been a great company to partner with. They have the experience and the technology to help me increase my bindery offerings. In 2008, I purchased/leased a GW 8000. From working with their preferred distributor to get the machine installed to getting the training we need to run the equipment, we have found Graphic Whizard and their partners to be easy to deal with and really care about our business and providing the right solution to meet our needs. In addition, since we have installed the GW 8000, we have seen an increase in perfing and scoring which has shown us the investment will continue to pay for itself."
