Accurate Printing Repair and Sales has recently upgraded Alphagraphics Sycamore's UV Coater to the new XDC-530. Rick Kralka, Owner of Alphagraphics Sycamore says "Overall, I am pleased with the operation and settings. The roller scraper adjustment is a big plus, it saves a lot of waste and the fluid transport on top of the roller allows for a more consistent application of fluids, I can feed the materials in and get a uniform coverage across all the pieces". Rick mostly UV coats pieces coming from his Xerox.
