Spiel Associates of Long Island City has recently installed another NEW XDC-530 Micro in New York City. Printicon of Manhattan chose the XDC-530 to protect and enhance their high-end work from their HP Indigo Press as well as their offset work. The XDC-530 Micro is the perfect fit for tight spaces without compromising features or abilities with its 20.75" wide coating width and many features usually only found on larger more expensive UV Coaters.
