**XDC-530 Micro**

The XDC-530 Micro coater has been a great addition to our digital print field. It's an easy upsell, and given the low cost of operation, and cleanup, it's very easy to run. We use ours about every other day. I was impressed with the results on various materials we have run, from scored book covers, to full coverage dark business cards. The coating evens out the colors, and virtually eliminates streaks left by digital printing. I'm very glad we made this step, as it will enhance our customers image on all their projects, and give us an invaluable upper hand on our competitors.
